Attorney Docket No.: 053498

AMENDMENTS TO THE CLAIMS

The following listing of claims will replace all prior versions of claims in the application:

Listing of Claims:

1. (Currently amended): An optical element, comprising:

at least two laminated circular-polarization-type-reflection polarizers (a) whose

wavelength bands for selective reflection of polarized light overlap one another, and

a retardation layer (b) which is placed between the circular-polarization-type-reflection

polarizers (a) and has a front retardation of substantially zero (in the normal direction) and a

retardation of at least \(\mathcal{N} \)8 with respect to incident light inclined by 30° relative to the normal

direction,

____wherein

the at least two circular-polarization-type-reflection polarizers (a) each have a side

capable of selectively reflecting a relatively short wavelength in the wavelength bands for

selective reflection, and

the sides of said at least two circular-polarization-type-reflection polarizers (a) capable of

selectively reflecting the relatively short wavelength are arranged opposite to each other.

2. (Canceled)

3. (Previously presented): The optical element according to Claim 1, wherein the

circular-polarization-type-reflection polarizer (a) comprises a cholesteric liquid crystal material.

- 2 -

Amendment under 37 CFR §1.111 U.S. Application No. 10/561,964

Attorney Docket No.: 053498

4. (Previously presented): The optical element according to Claim 1, wherein the

selective reflection wavelength of the at least two circular-polarization-type-reflection polarizers

(a) are overlapped in the wavelength range of 550 nm±10 nm.

5. (Previously presented): The optical element according to Claim 1, wherein the

retardation layer (b) is at least one selected from the group consisting of:

a layer of a cholesteric liquid crystal phase having a selective reflection wavelength band

in a range other than the visible light range and having a fixed planar alignment;

a layer of a rod-like liquid crystal having a fixed homeotropic alignment state;

a layer of a discotic liquid crystal having a fixed alignment state of a nematic phase or a

columnar phase;

a layer of a biaxially-oriented polymer film;

a layer of a negative uniaxial inorganic layered compound having an optical axis aligned

and fixed in the normal direction of a plane; and

a film produced with at least one polymer selected from the group consisting of

polyamide, polyimide, polyester, poly(etherketone), poly(amide-imide), and poly(ester-imide).

6. (Withdrawn): The optical element according to Claim 1, further comprising a λ/4

plate which is placed on the circular-polarization-type-reflection polarizer (a) provided on a

- 3 -

Attorney Docket No.: 053498

viewer side (liquid crystal side) such that transmitted light from a light source side can provide

linearly polarized light.

7. (Withdrawn): The optical element according to Claim 6, further comprising a

polarizing plate which is placed on the $\lambda/4$ plate side in such a manner that the direction of the

transmission axis of the polarizing plate is parallel with the direction of the axis of the linearly

polarized light to be transmitted from the light source side.

8. (Withdrawn): The optical element according to Claim 1, wherein each layer is

laminated with a transparent adhesive or pressure-sensitive adhesive.

9. (Withdrawn): A condensing backlight system, comprising:

the optical element according to Claim 1; and

at least a light source provided for the optical element.

10. (Withdrawn): A liquid crystal display, comprising:

the condensing backlight system according to Claim 9; and

at least a liquid crystal cell provided for the system.

11. (Original): A liquid crystal display, comprising:

the liquid crystal display according to Claim 10; and

- 4 -

Amendment under 37 CFR §1.111 U.S. Application No. 10/561,964

Attorney Docket No.: 053498

a diffusing plate which exhibits neither backward scattering nor depolarization and is

laminated on a viewer side of the liquid crystal cell.

12-20. (Canceled)

- 5 -
